DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,3,4,6,7,8,9,11,12,14,15,16,17,19 and 20 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Robinson (GB 2,214,633).

Robinson discloses a humidity reducing apparatus comprising inlet 14, outlet 12, electric heating element 22, baffle separating inlet and outlet, humidity sensor 30 at the low temperature zone.

The downward and upward are relative term and the apparatus can operate with rotating at different angle. Under the principals of inherency, if a prior art device, in its normal and usual operation, would necessarily perform the method claimed, then the method claimed will be considered to be anticipated by the prior art device. When the prior art device is the same as a device described in the specification for carrying out the claimed method, it can be assumed the device will inherently perform the claimed process. *Ir re King*, 801 F.2d 1324, 231 USPQ 136 (Fed. Cir. 1986).

3. Claim 15 is rejected under 35 U.S.C. 102(b) as being anticipated by Moriya et al. (U.S. Patent Number 5,230,466).

Moriya et al. disclose a humidity control apparatus comprising an inlet 4, inlet passage 3 (low air temperature zone), humidity sensor 18, outlet passage 7, outlet 8 and means for defining zones 13a.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2,5,10,13 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Robinson (GB 2,214,633) in view of prior art Applicant disclosure.

In regard to claim 2, Applicant discloses prior art (Fig.1) using the apparatus to the piano.

In regard to claims 5,10,13 and 18, Applicant discloses prior art (Fig.1) with heating element mounted on the circuit board.
